Nuclear Technology, Inc.

## **PRESS RELEASE**

February 16, 2009

### **Siempelkamp Nuclear Technology, Inc. Purchases MOTA Corporation, USA**

Siempelkamp Nuclear Technology, Inc. which has its North American headquarters in Walnut Creek, CA, announced today that it has purchased the USA operations of the MOTA Corporation.

John Mageski, President of Siempelkamp Nuclear Technology, Inc. said, "The acquisition of MOTA Corporation gives us a highly respected team based in the USA that will allow for a strategic expansion into the growing North American nuclear market. The knowledge and expertise of this US-based group will add considerable depth to the current Siempelkamp products and services, which are widely used in Europe and many other markets throughout the world."

Ron Mencarelli, CEO and majority shareholder of MOTA Corporation stated, "After the successful transition of our UK-based subsidiary in 2008, the sale of the remaining US operations to Siempelkamp, a globally active company in nuclear technology, was an appropriate decision. This will provide continued opportunity for MOTA's specialty services and expertise in North America and the much desired world market, while ensuring long term stability for its employees."

The South Carolina based company's name will change to Siempelkamp Nuclear Services, Inc. in the near future and is a subsidiary of Siempelkamp Nuclear Technology, Inc., headquartered in Walnut Creek, CA, which in turn is a wholly owned subsidiary of Siempelkamp Nukleartechnik GmbH, located in Krefeld, Germany.
